

More than a Supplier

About Our Company

What Can We Do for You?

Main activity of Cenmia Oy comprises developing and supplying of oil lubrication, hydraulic and pneumatic solutions for industrial needs. Own platforms and developments together with deep knowledge of fluid automation systems and wide supplier network allows us to manage demanding projects in a responsible manner.

Our main product portfolio includes circulating oil lubrication units, hydraulic power units and control panels, flow meters, electrical cabinets, pneumatic cabinets, control boxes and panels. Steel constructions manufactured in-house and availability of different machines supported by vast knowledge of mechanical engineering is a strong add-on to every project.

Along with project-based deliveries, where we are utilizing our own developments and platforms, we are proposing our production and engineering resources as a reliable basement for subcontracting purposes.

Our focus is to deliver reliable and efficient fluid automation technologies that are specially tailored for every customer.

From Design to Supply

Oil Lubrication Systems Hydraulic Systems Steel Constructions

Oil Lubrication Systems

- Oil lubrication units
- Flow meters
- Sump units
- Air Space Dryes

Hydraulic Systems

- Hydraulic power units
- Hydraulic control panels
- Valve Blocks
- Pneumatic systems

Steel Constructions

- Tanks and reservoirs
- Bases and frames
- Welded pipes and shells

Materials: Stainless and carbon steel, aluminium
